

Investment Philosophy

We are a fundamental, “bottom up” manager with a long-term time horizon. Our investment philosophy highlights buying high quality companies at a 30%+ discount to estimated fair value. Our approach emphasizes rigorous research, a disciplined stock selection process, a strong valuation orientation, a focused portfolio (25-35 holdings) and a well-defined sell discipline.

Quarterly Commentary: The U.S. Small Cap Value composite's 1Q19 return was +13.9% (net) compared to the benchmark Russell 2000 Value's return of +11.9%. In 1Q19, the strategy's +192 bps of outperformance was primarily driven by Information Technology (+449 bps), Healthcare (+128 bps) and Industrials (+122 bps) offset by underweighting in Financials (-198 bps), underweighting in Real Estate (-193 bps) and underweighting in Energy (-103 bps). The top three contributors were EPAM Systems (EPAM), Shutterstock (SSTK) and Verint Systems (VRT). The top three detractors were The Michaels Stores (MIK), Quotient Technology (QUOT) and Mistras Group (MG). We sold TriMas (TRS) and initiated one position in the quarter: BrightView (BV). We ended the quarter with 29 positions. We continue to believe the portfolio is well positioned for long-term appreciation with a weighted-average discount to fair value of 24.4% at the end of 1Q19.

When investors and consultants review our portfolio, they sometimes comment it doesn't appear to be a value portfolio. We'd like to provide some context on our investment approach. Ask investors to describe a value stock and you'll likely get a variety of answers. The classic definition of a value stock is one that looks “cheap” on a price/earnings or price/book multiple basis relative to the market or a peer group. We would contend that a value stock could also be one that trades at significant discount to intrinsic (or fair) value.

As it relates to our portfolio, investing in quality companies remains our first priority. However, the price we pay for these companies is very important and we want to buy these quality companies at a significant discount (at least 30%) to our assessment of intrinsic (or fair) value. We often obtain this discount due to some type of short-term event that causes the company's valuation to decline temporarily. This short-term event can have the effect of pressuring the company's earnings thereby making the current price/earnings multiple appear abnormally high. As a result, the company doesn't look “cheap” on a traditional multiple basis. An example of a short-term event is a software company moving from a license model to a cloud-based subscription model. This type of transition has significant long-term benefits for both the company and shareholders but it negatively impacts both revenue and earnings in the short-term. Therefore, traditional valuation multiples will be artificially high and not provide a true picture of what is really happening at the company. Internally, we make adjustments to look at normalized cash flows and consider the resulting normalized multiples when we assess the company's prospects. Furthermore, we focus on the company's stock price relative to our assessment of fair value and are less concerned about how cheap or expensive a company is relative to its current earnings or book value.

With the portfolio trading at over a 24% discount to fair value at the end of March 2019 we remain very excited about the portfolio's return potential.

Explanation of Equity Performance

Performance Footnote Disclosure

Bernzott Capital Advisors claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Bernzott Capital Advisors has been independently verified for the periods of Jan. 1, 1995 through December 31, 2017. Verification assesses whether the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The US Small Cap Value composite has been examined for the periods of Jan. 1, 1995 through December 31, 2017. The verification and performance examination reports are available upon request.

*Equity product inception: January 1, 1995. 1The difference between this column and the "total composite assets at period end" is the accounts that do not meet the size parameter for the composite and any new account under management that has not met the waiting period to join the composite. 2 Presented composite performance prior to October 1, 2006 is based upon equity only returns including allocated cash. Composite performance following October 1, 2006 is based on total account returns. * - To accommodate the needs of our high net worth non-institutional clients, Bernzott Capital Advisors has and will purchase equities across the capitalization spectrum, and not limit those purchases to the small cap universe. Effective October 1, 2010, the composite was redefined to only include those clients with a specific small cap mandate. This redefinition and client accommodation has resulted in a decline of AUM in the US Small Cap Value composite without impacting firm wide AUM.*

GIPS Compliance Requirements:

Bernzott Capital Advisors is an equity portfolio investment manager that invests in U.S.-based securities. Bernzott Capital Advisors is defined as an independent investment management firm that is not affiliated with any organization.

The US Small Cap Value Composite includes all fully discretionary portfolios that invest in small capitalization U.S. stocks that are considered to have risk-adjusted returns purchased, at reasonable prices. The composite includes concentrated portfolios of market leading companies with consistent operating performance, significant recurring revenue, solid operating margin, moderate leverage and strong returns on capital. A size parameter of \$250,000 is applied for composite membership. As of October 1, 2006, composite asset performance is derived from total account performance and eligible accounts are added to the composite after accounts are under management for two complete quarters. Prior to October 1, 2006, the composite was constructed from fully discretionary small cap equity only portfolios and fully discretionary small cap equity segment carve outs of accounts included in the firm composite. Prior to October 1, 2006, accounts were included in the composite their first full quarter under management. The Bernzott's benchmark is the Russell 2000 Value Index (taken from published sources). The Russell 2500 Value Index is provided as a secondary benchmark.

Gross-of-Fees returns reflect only the deduction of trading costs. Net performance returns reflect the deduction from gross performance of all trading costs, actual management fees and embedded fees. Since January 1, 2005 non-fee-paying accounts represent <1% of the composite assets. For the period Jan. 1, 2004 through Dec. 31, 2004 non-fee-paying accounts represent 1% of the composite assets. For the period Jan. 1, 1998 through Dec. 31, 2003 non-fee-paying accounts represent 2% of the composite assets. Bernzott performance is stated in US dollars. Prior to 10/1/06 the annual composite dispersion was an asset-weighted standard deviation calculation for the equity only portion of the account in the composite for the entire year and calculations did not take into account the effect of cash. Following that date, the annual composite dispersion is an asset-weighted standard deviation calculation using total account returns. 1995 and 1996 dispersion values are presented as n/a since five or fewer accounts are in the composite for the entire annual periods presented. Returns are presented gross and net of management fees and include the reinvestment of all income.

For institutional client accounts in the US Small Cap Value strategy, the management fee schedule is as follows: 0.90% on the first \$10 Million; 0.80% on the next \$15 Million; 0.75% on the next \$25 Million and 0.65% on the balance.

For private client accounts, the management fee schedule is as follows: 1% on the first \$2 Million; 0.75% on the next \$3 Million; 0.50% on the balance.

Special circumstances unique to a specific client may result in the negotiation of fees different than those set forth herein. We generally aggregate separate accounts of a single relationship for billing purposes. We may serve certain non-profits qualified under Section 501(c)3 IRC at a discount and we waive fees for employees and related parties.

Bernzott's composite was created July 1, 1999 and composite membership parameters were revised December 1, 2006 effective October 1, 2006. A complete list of Bernzott's composites is available upon request. The policies of valuing portfolios, calculating performance and preparing compliant presentations are available upon request. Bernzott does not utilize leverage, derivatives or short positions. Bernzott does not have any significant company events to disclose. A size parameter of \$250,000 is applied for composite membership. The minimum account size was implemented January 1, 2001. As of October 1, 2006, composite asset performance is derived from total account performance. Prior to October 1, 2006, the composite was constructed from fully discretionary small cap equity only portfolios and fully discretionary small cap equity segment carve outs of accounts included in the firm composite. Prior to January 1, 2004, the composite was known as the Small/Mid Cap Domestic Equity Composite. There was no change in the investment process as a result of the composite name change. Prior to October 1, 2006, carve-out portfolio segments were included in this composite and cash was allocated to the composite on a set percentage of 5%. As of October 1, 2006, portfolio segments are not included in this composite and all cash and cash equivalents are included in performance. An account will be removed from the composite membership if a cash outflow reduces the account value below the minimum size parameter. Additional information regarding the treatment of significant cash flows is available upon request.

Past performance is not indicative of future results.

Prior to April 2013, Schmetter & Associates, LLC. (S&A) served as an independent institutional sales and marketing representative for Camarillo, California based Bernzott Capital Advisors. S&A continues to receive 20-25% of collected revenue from specified institutional clients. S&A is not a broker/dealer. BCA currently employs one individual responsible for business development. This individual receives a % of collected revenue from specified institutional clients. All fees paid by Bernzott Capital are in hard dollars. No additional amount is ever billed to any client as a result of such payments.
