

## Investment Philosophy

We are a fundamental, “bottom up” manager with a long-term time horizon. Our investment philosophy highlights buying high quality companies at a 30%+ discount to estimated fair value. Our approach emphasizes rigorous research, a disciplined stock selection process, a strong valuation orientation, a focused portfolio (25-35 holdings) and a well-defined sell discipline.

Russell 2500 Value	1.9%	15.3%	-1.9%	9.0%	5.5%	11.0%	13.3%	10.9%

**Quarterly Commentary:** The U.S. Small Cap Value composite's 2Q19 return was +1.4% (net) compared to the benchmark Russell 2000 Value's return of +1.4%. In 2Q19, the strategy's in-line performance was primarily driven by Healthcare (+217 bps), underweighting in Energy (+48 bps) and Industrials (+29 bps) offset by underweighting in Financials (-123 bps), Information Technology (-97 bps) and underweighting in Utilities (-39 bps). The top three contributors were Catalent (CLTL), Generac (GNRC) and BrightView (BV). The top three detractors were Cloudera (CLDR), Shutterstock (SSTK) and The Michaels Companies (MIK). During the quarter we added three positions: Carbonite (CARB), Cloudera (CLDR), Inovalon (INOV). In addition, we sold four positions: Cloudera (CLDR), Hill-Rom (HRC), Synopsis (SNPS) and Total Systems Services (TSS). We ended the quarter with 28 positions. We continue to believe the portfolio is well positioned for long-term appreciation with a weighted-average discount to fair value of 24.8% and a weighted average market-capitalization of \$2.9 billion at the end of 2Q19.

We manage a portfolio of 25-35 companies as we feel this provides the appropriate balance of allowing us to invest in our best ideas while providing for the approximate level of diversification. We feel that investing in a concentrated portfolio is beneficial for several reasons:

- 1) Increased Knowledge:** There is no substitute for knowing your portfolio companies. Having intimate knowledge of a company's industry, competition, management team, operating model, financial statements, etc. not only provides you with great insights into the business, it allows you to make much better investment decisions. Managing a large, diversified portfolio would make it difficult, if not impossible to have this level of detailed insight and knowledge.
- 2) Higher Returns:** We want to invest in and get the “biggest bang for the buck” from our best ideas. Over time we've done this for our clients.
- 3) Lower Risk:** Somewhat surprisingly, we strongly believe managing a concentrated, rather than a diversified, portfolio is actually a risk mitigator, as we know a lot about the 25-35 we have invested in. Over the past three, five and 10 years, our strategy's beta and standard deviation has been lower than our benchmark, the Russell 2000 Value.
- 4) Risk Management:** We view risk as the permanent loss of capital. As such, we want to ensure portfolio companies are trading at a sufficient discount to our estimate of fair value at all times. We therefore have a fair value estimate for each company in the portfolio that is updated no less than quarterly. We initiate positions at 70% (or less) than fair value, trim positions at 90% of fair value and sell positions at 100% of fair value. In addition, we initiate positions at 2-3% position size, increase up to 3-5% position size over time either through appreciation or additional purchases. We start at 2-3% because even though we complete thorough due diligence prior to initiating a position, we are always learning about our portfolio companies, the markets are fickle and we do make mistakes. Lastly we have a maximum position size of 6%. This is a risk control so that no one position in our portfolio grows to be unusually large.

## Explanation of Equity Performance

## Performance Footnote Disclosure

Bernzott Capital Advisors claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Bernzott Capital Advisors has been independently verified for the periods of Jan. 1, 1995 through December 31, 2017. Verification assesses whether the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The US Small Cap Value composite has been examined for the periods of Jan. 1, 1995 through December 31, 2017. The verification and performance examination reports are available upon request.

*Equity product inception: January 1, 1995. 1The difference between this column and the "total composite assets at period end" is the accounts that do not meet the size parameter for the composite and any new account under management that has not met the waiting period to join the composite. 2 Presented composite performance prior to October 1, 2006 is based upon equity only returns including allocated cash. Composite performance following October 1, 2006 is based on total account returns. \* - To accommodate the needs of our high net worth non-institutional clients, Bernzott Capital Advisors has and will purchase equities across the capitalization spectrum, and not limit those purchases to the small cap universe. Effective October 1, 2010, the composite was redefined to only include those clients with a specific small cap mandate. This redefinition and client accommodation has resulted in a decline of AUM in the US Small Cap Value composite without impacting firm wide AUM.*

### GIPS Compliance Requirements:

Bernzott Capital Advisors is an equity portfolio investment manager that invests in U.S.-based securities. Bernzott Capital Advisors is defined as an independent investment management firm that is not affiliated with any organization.

The US Small Cap Value Composite includes all fully discretionary portfolios that invest in small capitalization U.S. stocks that are considered to have risk-adjusted returns purchased, at reasonable prices. The composite includes concentrated portfolios of market leading companies with consistent operating performance, significant recurring revenue, solid operating margin, moderate leverage and strong returns on capital. A size parameter of \$250,000 is applied for composite membership. As of October 1, 2006, composite asset performance is derived from total account performance and eligible accounts are added to the composite after accounts are under management for two complete quarters. Prior to October 1, 2006, the composite was constructed from fully discretionary small cap equity only portfolios and fully discretionary small cap equity segment carve outs of accounts included in the firm composite. Prior to October 1, 2006, accounts were included in the composite their first full quarter under management. The Bernzott's benchmark is the Russell 2000 Value Index (taken from published sources). The Russell 2500 Value Index is provided as a secondary benchmark.

Gross-of-Fees returns reflect only the deduction of trading costs. Net performance returns reflect the deduction from gross performance of all trading costs, actual management fees and embedded fees. Since January 1, 2005 non-fee-paying accounts represent <1% of the composite assets. For the period Jan. 1, 2004 through Dec. 31, 2004 non-fee-paying accounts represent 1% of the composite assets. For the period Jan. 1, 1998 through Dec. 31, 2003 non-fee-paying accounts represent 2% of the composite assets. Bernzott performance is stated in US dollars. Prior to 10/1/06 the annual composite dispersion was an asset-weighted standard deviation calculation for the equity only portion of the account in the composite for the entire year and calculations did not take into account the effect of cash. Following that date, the annual composite dispersion is an asset-weighted standard deviation calculation using total account returns. 1995 and 1996 dispersion values are presented as n/a since five or fewer accounts are in the composite for the entire annual periods presented. Returns are presented gross and net of management fees and include the reinvestment of all income.

For institutional client accounts in the US Small Cap Value strategy, the management fee schedule is as follows: 0.90% on the first \$10 Million; 0.80% on the next \$15 Million; 0.75% on the next \$25 Million and 0.65% on the balance.

For private client accounts, the management fee schedule is as follows: 1% on the first \$2 Million; 0.75% on the next \$3 Million; 0.50% on the balance.

Special circumstances unique to a specific client may result in the negotiation of fees different than those set forth herein. We generally aggregate separate accounts of a single relationship for billing purposes. We may serve certain non-profits qualified under Section 501(c)3 IRC at a discount and we waive fees for employees and related parties.

Bernzott's composite was created July 1, 1999 and composite membership parameters were revised December 1, 2006 effective October 1, 2006. A complete list of Bernzott's composites is available upon request. The policies of valuing portfolios, calculating performance and preparing compliant presentations are available upon request. Bernzott does not utilize leverage, derivatives or short positions. Bernzott does not have any significant company events to disclose. A size parameter of \$250,000 is applied for composite membership. The minimum account size was implemented January 1, 2001. As of October 1, 2006, composite asset performance is derived from total account performance. Prior to October 1, 2006, the composite was constructed from fully discretionary small cap equity only portfolios and fully discretionary small cap equity segment carve outs of accounts included in the firm composite. Prior to January 1, 2004, the composite was known as the Small/Mid Cap Domestic Equity Composite. There was no change in the investment process as a result of the composite name change. Prior to October 1, 2006, carve-out portfolio segments were included in this composite and cash was allocated to the composite on a set percentage of 5%. As of October 1, 2006, portfolio segments are not included in this composite and all cash and cash equivalents are included in performance. An account will be removed from the composite membership if a cash outflow reduces the account value below the minimum size parameter. Additional information regarding the treatment of significant cash flows is available upon request.

### Past performance is not indicative of future results.

*Prior to April 2013, Schmetter & Associates, LLC. (S&A) served as an independent institutional sales and marketing representative for Camarillo, California based Bernzott Capital Advisors. S&A continues to receive 20-25% of collected revenue from specified institutional clients. S&A is not a broker/dealer. BCA currently employs one individual responsible for business development. This individual receives a % of collected revenue from specified institutional clients. All fees paid by Bernzott Capital are in hard dollars. No additional amount is ever billed to any client as a result of such payments.*
